

Changes

sparX

There are a diversity of environments in our world. Each is the result of a combination of natural processes, and is constantly changing due to the effects of the sun, the wind, the rain, frosts, running water, moving ice, the sea, and movement of the earth's surface due to volcanic activity. Describe how the factors listed below could impact any environment.

FACTORS WHICH CAUSE CHANGE TO ENVIRONMENTS	ENVIRONMENTAL IMPACT
HIGH TEMPERATURES	
LOW TEMPERATURES	
STRONG WINDS	
RAIN	
RIVERS	
GLACIERS	
WAVE ACTION	
VOLCANIC ACTIVITY
